Economic Impact of Pension Expenditures

In 2022, pension expenditures from Missouri's state and local retirement systems supported 45,673 jobs and generated \$2.5 billion in wages and salaries for Missouri workers. These benefits also contributed to \$8.3 billion in total economic output and \$4.7 billion in value added to the state's economy. These expenditures also supported \$1.1 billion in tax revenue at the federal, state, and local levels, demonstrating the fiscal value of pension payments.

Defined benefit (DB) pensions play a vital role in ensuring older Americans have the financial resources to remain self-sufficient in retirement.
